DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Biegen (US 4,869,593) in view of Ina et al. (US 5,808,724). Biegen discloses coherent light source (10), incoherence means (18), optical dividing system (43), and image pickup and contrast adjusting means. Ina discloses exposure apparatus including position detecting means (101) and incoherence means. It would have been obvious to one of ordinary skill in the art to combine Biegen and Ina to obtain applicant's claims, using teachings of Biegen in Ina's positioning/alignment means (101), for a motivation of more precise profiling of/alignment to a wafer feature, e.g. an etched alignment mark.

3. **Response to Applicant's Arguments:** Applicant's arguments with respect to claims 1-11 have been considered but are moot in view of the new ground(s) of rejection. Ina et al. teaches an intermediate image in position detecting.

4. Newly submitted claim 12 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: method claim 12, in addition to not claiming a coherent light source with incoherence-transforming means, can have separate utility

in merely imaging a mark (as opposed to detecting position/aligning to a wafer mark).

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 12 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
